Easy-to-Use: Begin Matters within Hours

- Plug-and-play platform deployed via the cloud
- Lawyers can begin their first case with Luminance in less than 30 minutes, with no machine or user training necessary

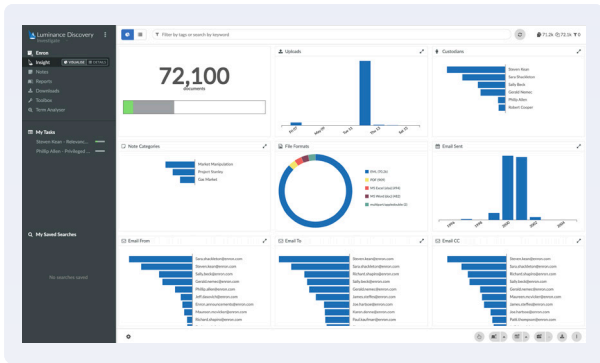

AI Analysis for Rapid Overview of Documents

- AI reads and forms an understanding of documents upon import
- Represents all documents within the dataset across a series of interactive widgets and 3D visualisations
- Helps lawyers to quickly find what they are looking for

“Luminance is fabulous - makes my life easier.”

USED BY 700+ ORGANISATIONS

Ensure Nothing is Overlooked with AI-Powered ECA

- Quickly and easily apply powerful searches and filters to cull irrelevant documents and find what matters
- Conceptual understanding allows lawyers to search for conceptually similar documents to the one under review in just one click
- Easily navigate between documents, with Luminance providing support for Microsoft Excel, WhatsApp and Skype Conversation files

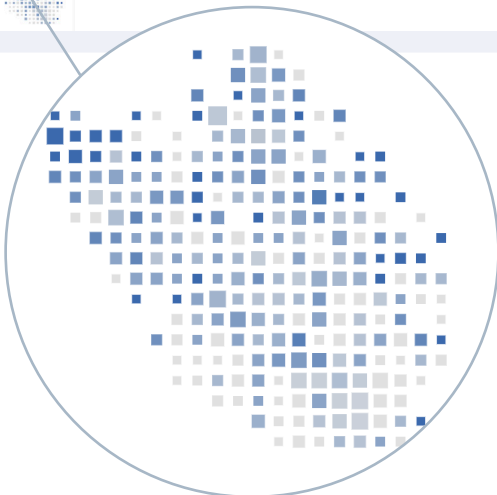

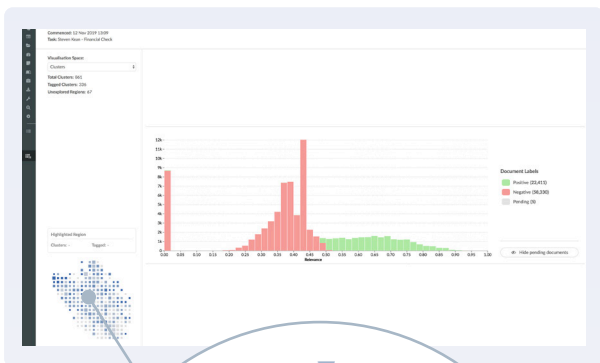

80% of dataset culled in minutes

50% time-savings during first use of Luminance

Burness Paull

“Using Luminance, we are able to comb through large volumes of data in an efficient way.”

AI-Driven Technology Assisted Review

- Observes the coding actions of the team, flagging where the coding of a document appears anomalous compared to previous coding behaviour and may warrant further review
- Predicts how relevant yet uncoded documents will be, ensuring lawyers can focus their time effectively
- With no prior training needed, Luminance’s heat map organises the entire dataset by conceptual similarity, with each tile representing conceptually-alike documents
- Depth of colour of each tile illustrates how many of these documents have been reviewed, making sure lawyers can allocate resources to under-investigated areas quickly so nothing is overlooked

Save Time, Reduce Costs and Gain a Stronger Negotiating Position

- With a faster identification of key information, lawyers gain an immediate understanding of the relative strengths and weaknesses of a case
- Places lawyers in the best position to provide strategic advice, negotiate or settle

10 times faster with Luminance

500GB > 80GB Dataset Reduced with AI-based deduplication

Norburg & Scherp

“In the eDiscovery market, where cost is a high priority, this is a gamechanger.”

Scalable for Matters of Any Size

From DSARs to terabytes of litigation data, Luminance is equally effective across both large and small projects

80% time-savings

180,000 documents reviewed

Review time slashed from 2 months to 2 weeks

大成 DENTONS

“We decided to make Luminance the standard document review platform for all our projects going forward.”

Use On Documents of Any Language

- Luminance’s advanced pattern recognition technology means that it is language-agnostic
- Use Luminance on documents in any language or even on multilingual datasets

“Luminance’s language and workflow capabilities have been transformational.”

Automatic PII Detection and Redaction

Detects Personally Identifiable Information (PII) and redacts all examples of certain critical and confidential types of information e.g., users could redact all addresses across their entire project

Court-Compliant, Word-Integrated Production

- Fully customisable robust production capabilities to suit any regulator/court requirements
- Seamless Word integration allows users to upload any Word file containing production references, and Luminance will automatically convert any production ID into a hyperlink which can be sent to any Luminance user
- Lawyers can upload a Word file containing document references into Luminance's E-bundler, and receive a single download bundle containing every document referenced in the file, in the referenced order

"By using Luminance, we're able to pull together the relevant material for cross-examination bundles within a matter of minutes."

World-Class Security

- Luminance's Infrastructure and Operational practices are certified as compliant with ISO 27001
- Operations are overseen by an Advisory Board of leading figures within the security space

"Luminance has one of the strongest security approaches of any organisation today."

Dedicated Account Manager and 24/7 Support

Luminance can offer advice on best practice and provide suggestions tailored to the specific requirements of your firm and client
