

## BREXIT IMPACT ASSESSMENT

# Alternative legal services provider

CAS is an award-winning leader in Managed Legal Services, providing corporate compliance and other legal support services to a range of major law firms and corporations. The company's clients include Vodafone, Santander and Clifford Chance. CAS conducted a regulatory compliance review of a client's contracts to locate any obligations and identify risks that may impact the organisation due to Brexit. Operating on a tight timescale, the firm deployed Luminance to tackle the review due to the technology's ability to flexibly adapt to changing standards whilst also enabling CAS to meet rigid external deadlines. Two hours after uploading the contracts, Luminance's data visualisation feature showed CAS an analysis of the contract types and clauses in the data room. The technology's combination of supervised and unsupervised machine learning then identified and recognised bespoke clauses relevant to the investigation and CAS was able to apply this learning across the entire data room.

Within the first three hours, Luminance identified 70% of standard clauses within the document. The technology automatically clustered documents based on the patterns in the language, allowing the team to group contracts by clause. Luminance's collaborative workflow functionalities allowed the same contracts to then be assigned to multiple Legal Advisors, so they were able to work on the same document

simultaneously whilst concentrating on different parts of it. Throughout the project, the team of Legal Advisors was able to flag risks in order of severity through Luminance's notes and reporting features, once more streamlining the review process by allowing CAS to focus on the riskiest documents first.

The team used Luminance to create reports at the end of the project – distributed both internally and to the client – on the risks identified throughout the contracts to clearly demonstrate exposure. CAS estimated that Luminance reduced time spent on the review by over 75% versus manual methods. The company was able to complete the review of the entire document set within the client's tight timeframe without random sampling or lengthy manual review. This allowed them to dedicate the remaining time to a focused, strategic analysis of the findings in preparation for Brexit.

"Luminance's new-era product offers our clients exactly the kind of innovation they need."

**LUCY DIXON, DIRECTOR, CAS**
